The latest volume in the popular 150 Best series, 150 Best Cottage & Cabin Ideas is your ultimate resource for creating the ideal remote retreat. Discover 150 cottages and cabins from around the world that feature the luxury of modern home construction while preserving the surrounding landscape and utilizing local natural resources. These enviable dwellings showcase inspirations for homeowners, designers, and architects—from exposed-beam ceilings and built-in furnishings to large open-floor plans and floor-to-ceiling windows that accentuate picturesque views of the great outdoors. Filled with stunning full-color photographs and detailed design plans, this volume highlights

hidden sanctuaries that offer spacious, comfortable, and, most important, more natural living environments. Whether you're planning a vacation with family and friends or looking for a way to escape the daily grind, this book allows you to explore the diversity and simplicity of the modern cottage and cabin.

Francesc Zamora Mola studied interior architecture in Barcelona and then in San Francisco, where he honed his design skills working with innovative architecture firms. Mr. Zamora lives in Barcelona, where he writes about design and architecture. He is the author of numerous architecture books, including 150 Best Mini Interior Ideas, Star Commercial Spaces, and 150 Best New Apartment Ideas.

Excellent book clear beautiful pictures and multiple layouts and plans for each house.

The book itself is really good, downloaded it in the Kindle format which does not lend itself well to this type of book. The pictures and formatting or a little weird. The book and the information is incredible.

Best design book I have read in years. Great ideas and fresh details.

It's okay I suppose. There were homes from dwell magazine that appeared in the book which was a turn off for me. I was expecting down to earth dwellings that the average family can afford to do, but the high end cabins are unrealistic for most people.

This is the book, if you are looking for excellent Modern Minimalist designs for homes. It is packed with great Architectural Design. Every page has something to offer. I'm planning a Small Home of 700 sq. ft. Even though most of these homes are larger, they incorporate many of the design ideas, features and concepts I want to use.

This is a fabulous book with lovely photos. I got this book for 2 reasons. 1) I live on a lake and am curious to see what other types of architecture is out there, other than the homes in my area. 2) My husband and I are thinking of moving to Colorado and I wanted to see what kind of mountain home styles are out there. So I found out from this book that these homes are probably extremely expensive! They are not the old-fashioned log cabins we have rented in the past. They are very

modern, sleek, and elegant, with plenty of glass. I think in the end, we'll just buy an RV, drive around the US, and park it in mountain and lake campgrounds. I think it'll be cheaper! :-)

I appreciate that Mr. Zamora gave us websites of the architectural firms so that readers can explore these companies and their designs more in depth.

Great collection of ideas and beautiful pictures. Fun to look through and it gave me a few ideas, but now that I've looked at them all, I'm left wondering now what do I do with this book. :-). I am glad I got it overall, but not too many of the ideas were applicable to what I was trying to accomplish. The amount of details for each idea varies from pictures and a basic layout, to layouts that include measurements. It would have been nice to have a uniform layout such as pictures, description/background, fully layout and measurements. I suppose this is just due to whatever the author could get from the architects or glean from other sources.

Very enjoyable, covers a wide range of sizes of structures and a plan for each.
