Student commentsIt is a great introduction to the world of midwifery.Easy to read in understandable

language

Sue has been a midwife for over 30 years, and believes passionately in the contribution that midwives can make to the lives of women, babies and families. This has driven her career path and practice in clinical midwifery, education and research. Sue is currently undertaking an MPhil/PhD at Middlesex University looking at compassionate care from women's and midwives' perspectives. Sue is a midwife and educationalist by background. After qualifying as a nurse at Guy's Hospital, she trained as a midwife and, following a year working in Australia, returned to practice as a midwife in London and in Dorset, working in all areas of maternity services. Sue completed the Advanced Diploma in Midwifery and then moved into midwifery education, completing a Post Graduate Certificate in the Education of Adults. Sue designed the first 'direct entry' midwifery programme in London, based on her own original 'patchwork' design. She was Principal Lecturer and Lead Midwife for Education (LME) at the Middlesex University, London, and developed a range of innovative continuing education courses for midwives from initial degree to Masters level. Sue worked at the Royal College of Midwives for ten years as the research and education manager and LME, and in this role supported key national education initiatives including the RCM examination of the newborn learning module; RCM return to midwifery practice programme, the RCM education strategy 'Valuing Practice' and overseas pre-registration curricula. She managed the PEARLS research project sponsored by the Health Foundation. Her RCM role included acting as a media spokesperson on midwifery and neonatal issues. More recently, Sue has been working as an independent midwife consultant, and has been involved in a major UNICEF programme overseas, has developed and curated a number of major national conferences, and has designed electronic learning materials. She has edited the previous 13th and 14th editions of Mayes Midwifery. She received an Honorary Fellowship from the RCM in June 2014.

Easy to follow, informative book. However, I would think for this price point they could spring for colored pictures. All of the actual photos are black and white

This is just one replacement for the many Midwifery books I had before all was destroyed in our Feb 2012 housefire. I was so glad to see it on . It is difficult to remember everything we had but ever so often, while scanning the site, I would see something that reminded me of something I had before. The book arrived on time and was securely wrapped. I look forward to reacquainting myself with the information inside. thank you.

Awesome!!

Have used it to guide my practice in caring for the pre and post natal patients. I continue to recommend it to my batch mates.

I find Mayes' an important resource. It is well-indexed, so I can actually find what I want - or know that the book doesn't cover that specific information. Therefore, I don't waste time thumbing through the chapters. During school I used it constantly; it was my first go-to text. And now I still refer to it often. While it is comprehensive, I do have to refer to either Myles (or Varney or even Frye) for some information. I guess no single book can have everything!
