"Put your heart in the write place with these books of 12 fold-and-mail-style letters that use clever prompts ("I knew you were the one for me when..." "What I love about us...") to make composing meaningful missives a whole lot easier. My favorite is Letters to My Love. I've been telling people this for years: What a partner wants to know is how you really feel. This will make him or her swoon!"- Oprah

Some people want to know what the 12 letter prompts are before buying, so here they are:When we first met...I knew you were the one for me when...What I love about us...I promise to you...It's the little things, like when...You are remarkable because...Here's a story I've never told you...This is an invitation to...I never want to forget this...I wish for us a future full of...[Blank - write your own][Blank - write your own]

Saw this in a boutique, knew I'd look on later!! Nice quality book with pages resembling envelopes

that you unfold and write letters in. Thought this would be great fun to fill in over time for our next anniversary! ☺

Super cute idea. I intend to gift these to my fiancé for our upcoming wedding just to capture all the things I love and cherish about him and our relationship. Sappy? You betcha. But what timing could possibly be more appropriate for a little extra sap?

It is not the best product ever. The moment I opened it, the front cover was not properly glued to the pages. I decided I would glue it myself when I was done writing since I needed the book in that moment. Whilst I was writing, the pages came off the cover completely. It's just disappointing since I would never expect that from a book. Overall, the book is clearly poorly put together, but it makes a good gift.

I think that this is a great gift. I enjoy the prompts that are given so you do not have to think of something to write by yourself every single time, and I think the length for each letter is great. My significant other loves the gift. I gave it to them as a birthday present and count down until I relocate to their city. Great present.

I was so excited for this to arrive, I opened the package and pulled it out, upon opening it I felt it sort of feel like it was crumbling and when I fully opened it I noticed that it was ripping apart. I'm very dissapointed. Hope to get a refund because this felt like a rip off. Literally.

I was excited to purchase this however the binding and the notes are unglued as shown in the picture. I just received this today, so I guess I will have to improvise.

Very nice book, and a great gift to give to your loved one. Fortunately this book was in great shape and I can't wait to start writing in it. It's nice that it also comes with stickers you can seal your envelopes with.

I bought this for my boyfriend as he is in the military and wanted to give him a gift he can take with him. I love this little book. It's easy and helps prompt you for the letters to your significant other. The only issue I ran into with this book is the binding comes undone a little bit and sometimes the pages rip as you are saposne to put a magazine under the page due to them not coming out of the book.

(which even with a magazine under it it still rips a bit) but even with those two issues I ran into its perfect and I know he's going to love it
