I was so happy that I found this textbook via friend's recommendation! I always wondered how she was able to lose all that weight so fast. In the past I tried everything, diets, juices, vegan eating, everything! I hated those love handles, they were so pesky and just wouldn't go away. This was the perfect read for me on my daily commute to work! Everything in this book is so clear, concise and intelligently written. Thanks, Susan! I was able to lose 12 pounds from reading the guidance in your book!

Hello guys. I am mahnoor and I have been facing weight gain issues all my life and always find it difficult to shed pounds. Conversely, it is amazingly easy for me to put on weight in no time. I tried everything over the years (including all kinds of diet plans, workouts, jogging, walks and just about anything else under the blue sky) to lose those extra fats accumulated all around. Nothing has really worked for me until a friend recommended me to go through this book. Frankly it worked miracles for me. For the first time in my life i was able to truly understand the relationship between my weight gain and my dietary habits. I was able to grasp the theory of food metabolism and how i can use it to lose weight. I have been able to handle my weight gain issues much more effectively ever since and lost over 20 lbs in just about a couple of months. The important factor is that this time over the weight loss has been permanent and I haven't gained back all those lost pounds. This is definitely a paradigm shift in my life style and i feel much healthier and living a wholesome life. This book is a must read for any person who is fighting a losing battle with obesity or planning to trim down. Hearty thanks to the author for producing such a balanced and easy to follow weight watch and loss book. I strongly recommend.
