African Savanna

Synopsis

The African grasslands stretch across the continent below the Sahara. In a square of land about the size of a living room, children will see animals they might have encountered only at the zoo. . .discover the rewards and dangers of their natural home. . .and observe how these creatures live with each other in a changing, endangered environment. It's an exciting journey of discovery, coming to you from the One Small Square series of interactive science and nature books. . .where the next stop could be as near as your backyard or as far as half a world away.

Grade Level: 1 - 4

Customer Reviews

The spotlight is on the dangerous and endangered habitat of the African grasslands. Scene one: a patch of land the size of your living room. Close up: a lion cub playfully paws at a tortoise. Supporting cast: plants, soil, rocks, weather, and many, many animals great and small. Pull up a chair and observe this amazing travelogue, featuring one small square below the Sahara, half a world away. African Savanna is just one of the exciting, vibrantly illustrated volumes in the critically acclaimed One Small Square series of science and nature books for children ages 7 and up. Each book includes: Stunning full-color illustrations of each habitat and its creatures; Motivating experiments and activities, along with clear, diagrammed instructions and safety tips; A picture field

guide of the habitat; A glossary-index and resource list. One Small Square--an eye-opening series originally published in hardcover--puts the whole world in perspective for children, one small square at a time. Each book is a thrilling, up-close encounter with mammals, insects, plants, birds, fish, amphibians, bacteria, and the ecosystems in which they live.

Donald M. Silver is the author of more than 40 science books for children and teachers alike. In addition to the award-winning One Small Square series, he has written The Animal World, Why Save the Rain Forest?, Extinction Is Forever, and The Dinosaur Activity Book—all illustrated by Patricia J. Wynne. Patricia J. Wynne's illustrations have also appeared in Scientific American, Natural History, and The New York Times as well as in the highly praised books Hungry, Hungry Sharks, and The Human Body. Both the author and illustrator live in New York City.

This book combines a comprehensive look at savanna ecosystems with projects and explorations for kids to do. At the back is an excellent look at the animal life of the savanna, grouped by classifications of animals (mammals, birds, reptiles, invertebrates...) Very well done - TONS of information for your young to middle-grades learner.

I ordered this book when I found out my kindergartener would be making a diorama about the African Savanna. He and his friends really enjoyed this book and it had all the information he needed and more. Prime shipping and it was delivered in no time.

This series is a must for nature lovers

This book is so much fun and educational. Great for multiple ages and learning styles. It has beautiful pictures and easy to do projects with little preparation, but a lifetime worth of learning! We have the cave, backyard, and Pond!!
