SCIENCE EXPLORER ENVIRONMENTAL SCIENCE STUDENT EDITION 2007C

Synopsis

Prentice Hall Science Explorer ©2007 Environmental Science Student Edition Lead author Michael Padilla once again sets the standard for engaging, hands-on science exploration. The new Prentice Hall Science Explorer now offers 16 small books that give you the flexibility to customize lessons to match your curriculum. A new title, *The Nature of Science and Technology*, introduces students to the sciences, scientific methods, skills, and technology and design concepts they'll need to succeed in middle grades science! Whether using the text alone or in tandem with exceptional ancillaries and technology, teachers can utilize differentiated instruction components to meet the needs of every student at every learning level. Unparalleled technology activates text content and takes science beyond the classroom and into the real world. A proven formula for reading success Before, during, and after reading support in every lesson enables students to fully understand the big ideas of science. Integrate labs with ease! More than 1,500 labs and activities are right at your fingertips with the Lab zone® Easy Planner CD-ROM. Easily search all labs by time, content, or standard. Graphics come alive online Active Art helps students see text art in a new way by providing interactive, hands-on explorations of key concepts that reinforce learning. A Prentice Hall Exclusive Partnership! Emmy Award-winning Discovery Channel School® videos and DVDs provide visual support for every chapter and support learning with current, real-world examples. Research and Validity Quantitative and qualitative research supporting Prentice Hall Science programs

Book Information

Hardcover

Publisher: PRENTICE HALL; 1st edition (January 6, 2006)

Language: English

ISBN-10: 0132011484

ISBN-13: 978-0132011488

Product Dimensions: 9.1 x 0.7 x 11 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 6 customer reviews

Best Sellers Rank: #103,480 in Books (See Top 100 in Books) #10 in Books > Teens > Education & Reference > Science & Technology > Ecology #291 in Books > Textbooks > Education > Secondary Education #386 in Books > Science & Math > Earth Sciences > Environmental Science

I expected this book to be at a more advanced level than what it is. It's a good, well written book, but it's something I could have used several years ago with my homeschooled son. Overall I would recommend this book, because the articles are well written and interesting, but not for kids who are advanced in Science.

I got this book for my homebound 7th grader. She does an online program but we used this book as a supplement to the online curriculum. It was not listed as new but was in excellent condition

We loved this book for creating our own Earth Science in Middle School. It was easy to use for a self learner and had good information and easy but fun experiments. We even loaned our copy to a friend when we were finished.

This is a textbook to help my son with this schoolwork as the school does not have a big enough

budget to provide every child with their own textbook, so we decided to purchase.

This book was to replace one that my son spilled soda on. It was in better condition than his book was when he got it and much less than a brand new one.

got the book for school...seems to be the correct product and arrived just in time for the commencement of school.
