The Rock Cycle (Science Readers: Content And Literacy)

Synopsis

Rocks are constantly changing form through weathering, heat, pressure, and erosion. Although rocks are constantly changing, the process can take millions of years! Over time different types of rocks form, deconstruct, and recycle. Find out just how amazing rocks are by diving into the pages of this exciting book! Vibrant, colorful images and photographs fill the pages paired with high-interest informational text, fun facts, an easy-to-navigate table of contents, and a helpful glossary and index. To bring concepts to life, a "Think Like a Scientist" activity that supports STEM instruction is included at the end of the book.

About Shell Education Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.

Book Information

Lexile Measure: 750 (What's this?)

Series: Science Readers: Content and Literacy

Paperback: 32 pages

Publisher: Teacher Created Materials; 1 edition (July 20, 2015)

Language: English

ISBN-10: 1480746886

ISBN-13: 978-1480746886

Product Dimensions: 7 x 0.2 x 9 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #949,003 in Books (See Top 100 in Books) #141 in Books > Children's Books > Education & Reference > Science Studies > Nature > Rocks & Minerals #179 in Books > Science & Math > Nature & Ecology > Field Guides > Rocks & Minerals #516 in Books > Children's Books > Science, Nature & How It Works > Experiments & Projects

Age Range: 7 - 12 years

Grade Level: 4 - 6

Customer Reviews

Gr 3-5-The latest additions to this ongoing series deliver the same authoritative, comprehensive, and relevant information that educators have come to expect from the publisher. The high-interest subjects support inquiry-based learning and encourage readers to think critically about science, and they do so in an engaging way that holds students' attention. Photos, illustrations, and diagrams keep children motivated, while features such as "Think Like a Scientist" and "Your Turn!" encourage learning through hands-on activities. What makes this series stand out, though, are the fascinating facts ("grizzly bears can smell a dead animal up to 20 kilometers away!") and the fabulous photos, such as the close-up view of a butterfly's eye and rolled-up tongue. Smartly written, these innovative and imaginative volumes make learning fun. VERDICT First-rate nonfiction. (c) Copyright 2011. Library Journals LLC, a wholly owned subsidiary of Media Source, Inc. Just what we needed to get a clear picture of the rock cycle.

We got this for our 6 year old grandson and he could read it and liked it very much.
