## Customer Reviews

Marlon Lodge, the founder codirector of Earworms Learning, is an author, linguist, and language trainer of many years' experience. He lives and works in Dusseldorf.

I bought this roughly a week and a half ago and it feels like it has helped my vocabulary improve quite a bit. I was a bit worried that the music would kind of ruin the effect of trying to listen to the Japanese and Japanese to english translations by making it difficult to hear, but it didn't. The only downside to this product is when the woman speaks in Japanese it will occasionally do an echo of the word on the third time saying it, and it kind of ruins it if you're really, really trying hard to hear how the word is pronounced. Otherwise I really like this product and have suggested it to my friends that want to one day visit Japan seeing as this will teach you a lot of the basics you will require to be able to communicate with the Japanese. If there happens to be anymore for learning additional Japanese phrases past Volumes 1 & 2 I would gladly invest in them.

This product is okay at best. But on the other hand there is some minor mispronunciations. That can easily be overcome by using some of the tools along with this such as TextFugu.com and JapanesePod101.com. The key here is to build on your vocabulary and by doing so you will be able to put complete proper sentences together. It also doesn't hurt learning the basics about Japanese such as hiragana and katakana.

I purchased this product for my son for his birthday. The PDF disk is missing with the phrase book. and there are problems with disk two. I am extremely disappointed as I paid a lot of money in Australian dollars for this gift.

Fantastic! I studied Japanese years ago and I bought this as a refresher before a trip to Japan. It was great, and well worth the money. In fact, I'd recommend this over a traditional Japanese language course. It's faster, easier, and infinitely more useful than the grammar lessons I learned in a class (I mean honestly, when are you ever going to ask someone if they have been to Half Dome in Yosemite?). Earworms Rapid Japanese audio CDs are simply brilliant and funny. I listened while walking which made it a breeze (I'm sure I sounded like a nut but I learned phrases that were spot on useful and never included in 3 years of traditional Japanese language classes). So if you are looking to learn some Japanese for travel or just for fun this is the way to go you won't be sorry you did. (And if you want to add a little written Japanese that is infinitely more useful than a class, add Tuttle's Japanese Phrase-A-Day product it's great too!)
