Sterling Test Prep CLEP Chemistry Practice Questions: High Yield CLEP Chemistry Questions

Synopsis

CLEP Chemistry bestseller! A NEW edition with complete explanations! 1,200+ chemistry practice questions with detailed explanations. All questions are multiple 5-choice questions - like the actual test - and cover all topics tested on CLEP Chemistry: A Electronic and atomic structure of matter A Periodic table A Chemical bonding A States of matter: gases, liquids, solids A Solution chemistry A Acids and bases A Stoichiometry A Equilibrium and reaction rates A Thermochemistry A Electrochemistry

Book Information

Paperback: 628 pages

Publisher: CreateSpace Independent Publishing Platform (June 17, 2014)

Language: English

ISBN-10: 1500224758

ISBN-13: 978-1500224752

Product Dimensions: 8.5 x 1.4 x 11 inches

Shipping Weight: 2.7 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 25 customer reviews

Best Sellers Rank: #355,630 in Books (See Top 100 in Books) #43 in Books > Education & Teaching > Higher & Continuing Education > Test Preparation > CLEP #1110 in Books > Education & Teaching > Test Preparation > College & High School #1252 in Books > Science & Math > Chemistry > General & Reference

Customer Reviews

Scoring well on College-Level Examination Program (CLEP) Chemistry is important for your ability to bypass taking the class and earn college credit. A To achieve a high score, you need to develop skills to properly apply the knowledge you have and quickly choose the correct answer. A You must solve numerous practice questions that represent the style and content of the CLEP questions. A Understanding key science concepts is more valuable than memorizing terms. A A This book provides over 1,200 chemistry practice questions that test your knowledge of all CLEP Chemistry topics. A At the back of the book, you will find answer keys (use them to verify your answers) and explanations to questions. A These explanations provide step-by-step solutions for quantitative questions and detailed explanations for conceptual questions. A They also cover the foundations of general chemistry topics needed to answer related questions on the test. A By reading these explanations carefully and understanding how they apply to solving the question, you will learn

important chemistry concepts and the relationships between them. This will prepare you for the test and you will significantly increase your score. All the questions are prepared by our science editors who possess extensive credentials and are educated in top colleges and universities. Our editors are experts on teaching sciences, preparing students for standardized science tests and have coached thousands of undergraduate and graduate school applicants on admission strategies. Used books may have outdated content. We make content updates regularly based on customers' comments, editorial input and latest test changes. The most current version is only available directly from (sold & shipped by), Barnes & Noble and Sterling Test Prep web store.

Electronic and Atomic Structure of Matter; Periodic Table
Atomic theory and atomic mass
Atomic number and mass number; isotopes and mass spectroscopy
Electron energy levels: atomic spectra, quantum numbers, atomic orbitals
Periodic relationships (atomic radii, ionization energies, electron affinities, oxidation states)
Bonding
Bonding properties and structures
Ionic, covalent, metallic bonds
Polarity of bonds, electronegativities
Molecular geometry
Intermolecular forces (hydrogen bonding, dipole-dipole, London dispersion forces)
Molecular models: valence bond theory, hybridization of orbitals, resonance, sigma and pi bonds
States of Matter: Gases, Liquids, Solids
Laws of ideal gases; equations of state for an ideal gas
Kinetic molecular theory
Molar volumes, density
Types of solids, phase changes, phase diagrams
Changes of state, critical phenomena, crystal structure
Intermolecular forces
Solution Chemistry
Solution preparation, types of solutions, stoichiometry
Molarity and percent by mass concentrations
Solubility of solids, liquids and gases
Precipitation and solubility rules
Colligative properties; interionic attraction
Acids and Bases
Strong and weak acids and bases
Brønsted-Lowry theory
Concepts of Arrhenius and Lewis
pH, titrations, indicators
Oxidation-reduction reactions
Stoichiometry
Molar mass, Avogadro's number
Empirical and molecular formulas
Ionic and molecular species present in chemical systems; net-ionic equations
Balancing of chemical equations
Stoichiometric calculations, percent yield, limiting reactants
Equilibrium and Reaction Rates
Equilibrium systems
Le Chatelier's principle and position of equilibrium
Equilibrium constants, equilibrium expressions
Factors affecting reaction rates; rate constant; rate-determining step
Potential energy, activation energy
Thermodynamics
First law: heat of formation; heat of reaction; change

enthalpy, Hess's law; heat capacity; heats of vaporization and fusion
Second law: free energy of formation; free energy of reaction; dependence of change in free energy on enthalpy and entropy changes
Chemical reactions, heating and cooling curves, entropy
Electrochemistry
Galvanic and electrolytic cells
Redox reactions (including half-reactions) within electrochemical cells
Standard reduction potentials, oxidation number
Answer Keys & Explanations

These chemistry practice problems were an integral part of my studying. It was only when I practiced with problems did I reinforce what I was learning. I like the many examples for each concept. Practice allowed me to become much stronger in chemistry. The questions in this book were a great review of the important concepts. Would recommend this book.

I used this chemistry book and the CLEP biology book from STP. My friend used both and she recommended them to me. Both are excellent prep for the CLEP exam. Loaded with great content and solutions have many valuable pointers on how to solve problems and the book provides great information to prepare for CLEP. Highly recommend these books. My scores were great and I needed to prepare so I would be sure to do well on test day, it worked.

I needed the practice contained within the book. The questions challenged me to be sure that I actually knew the material. An excellent source of practice questions. I was very prepared for the exam. Recommend it.

I got the score I needed for the CLEP chemistry exam. This book was great for me to use to prep for the exam. A few friends used this and other books. I found this the most helpful and the results were great. Recommend this book to study for the CLEP chemistry exam. The explanations helped me understand the material. I like that the questions in the book are separated by topics and each topic has a separate chapter. I was able to save time by focusing on what topics I needed to practice.

Very happy with the questions. Good selection of questions and a variety of difficulty level. Practicing the questions helped me master the material. Took my learning from theory to application. It was a great simulation for the actual test.

I enjoyed studying for the CLEP chemistry exam with this book. Great source of questions and

detailed, step-by-step explanations that got me ready for testday. This book is expanded and more detailed than my friends so I decided to get the updated version. Many more explanations which is definitely worth the money. I was relaxed during the exam because I know that I was ready from the questions I practiced.

great chemistry practice questions that prepared me for the exam. Similar to my experience on the test. Spend time with the explanations as this is what separates this book from others that I previewed.

Great prep material for the CLEP chemistry exam. I took several CLEP exams and Sterling Prep had the best practice material. I was prepared for the chemistry and scored well. Great book and recommend it over some other CLEP products out there.
