Inside The Secret Space Programs

Synopsis

"Inside the Secret Space Programs" is a continuation of two previous works by the Author, Herbert G. Dorsey III - "Secret Science and the Secret Space Program", and "The Covert Colonization of Our Solar System". The previous two books, document the progress of antigravity propulsion, from the German Vrill Society and their Jensietsfugmaschine [otherworld flying machine], in 1923 and Thomas Townsend Brown's experiments with gravitators at about the same time, to the present black projects inside companies like Lockheed Martin, Northrup Grumman, Boeing Aerospace, and North American, which create antigravity craft for the Air Force, Navy and some private corporations like the secretive Interplanetary Corporate Conglomerate (ICC). As more information becomes available from persons, like Corey Goode, William Tompkins, and Tony Rodrigues and others who worked in the secret space programs is revealed, a better picture of what goes on inside these programs is made possible. Sufficient new information has been revealed to warrant a new book on the subject. And remarkably, the new information, not only to a large degree, reinforces the information revealed in the previous two books, but also adds important information on subjects like where these kilometers long space craft are being built on this planet and how is it being financed. If you are interested in learning more about is really going on out in space, the covert colonizing, militarization, manufacturing and mining of Mars, other planets, moons and asteroids in our Solar system and even in other star systems, or you are curious about the technology used and how it works, this would be an excellent book to study.

Customer Reviews

Herbert does it again exposing from multiple sources the history of so much covert dealings that have been going on behind the scenes in our nation and the world along with exposing the culprits and their agendas so carefully hidden from view and replaced with plausible deniability.

Excellent coverage of how the secret space program works

Aside from the unforgivable and distracting errors in sentence structure, spelling, punctuation, syntax AND grammar (this guy can't write worth a damn), the info he's sharing is must-read material right now. The hyperlinked resources are especially helpful.

Everyone should read this. By everyone I mean every person alive on this planet. It will open your eyes. The truth is here. But of course the powers that be would deny most of it and call this information fiction if everyone began to believe it because it would threaten their hold on power.

We needed to know that we can survive the cable's evil ways. Thanks Mr. Dorsey for your info, please keep in writing we're hungry for more. Thanks a million.

I can imagine that a lot of people would not want us knowing what really goes on in Government. By reading other books and studying true history and having things that have personally happened to me, I believe this book is far more accurate than anything the lying Mainstream Media spoon feeds us.

I'm not finished reading the book yet, but so far it is highly interesting!

Another really good and concise overview of what is going on in the secret space program and the history leading up to it. Tons of info and a very fair price. Very recommendable! Thanks Herbert

Dorsey.
