## **Customer Reviews**

I love the Singapore Math series of workbooks. Have been using them from level 3 for my daughter

and they have been very helpful in logical thinking. Especially the word problems. I love their solutions too.

Excellent addition for your child schooling if you are unsatisfied with the school curriculum. Just keep doing it.

Bought both 6a and b. Good to practice.

Good material. Answer keys are wrong at places though. Essential companion to school text. My kid is in 6th and is covering linear equations, geometry, probability and stuff. Definitely helps

Best problems ever. My son loves it

Good review and practice help for math.

Great help, but not as coordinate with school textbook as I wished
