SAM training and assessments simulate the real MS Office environment, which will prepare you for workplace success. Set yourself up for better grades. Automatic feedback on assignments and a personalized study plan help you stay on track for improved grades.

Steven M. Freund attended the University of Central Florida and serves as a leader instructor of various Microsoft Office, computer concepts, programming, and Internet technology courses throughout Central Florida. An integral author for the successful Shelly Cashman Series since 2001, he has presented at the annual customer conference, the Shelly Cashman Series Institute, as well as other customer events. Mr. Freund has co-authored multiple editions of DISCOVERING COMPUTERS, Mozilla Firefox, Windows Internet Explorer, Windows, Office, and Dreamweaver books. He has also written numerous successful instructor supplements. Joy L. Starks is a Professor of Computer and Information Technology at Indiana University Purdue University Indianapolis. She has written chapters in several of the Shelly Cashman Series Office books and authored the Photoshop, Java Programming, and Microsoft Publisher series of books. In addition to speaking engagements, she hosts the nationally-renowned Tech Camp for Teachers on the IUPUI campus each summer. For over 15 years, Mr. Schmieder has served as a computer technology instructor in adjunct and full-time capacities in curriculum instruction, corporate training, continuing education, economic and workforce development, professional development, small business, and webmaster certificate programs throughout North Carolina. His classroom instruction has served students at NC State University and many schools in the NC Community College System. He is a member of the NC Computer Instructors Association (NCCIA), NC Community College Faculty Association

(NCCCFA), Textbook and Academic Authors Association (TAA), and US Distance Learning Association (USDLA). He holds certifications as a Microsoft Certified Trainer and Microsoft Office Master Specialist and is a regular presenter at local and national conferences.

This is one of the most confusingly organized books I've ever read. Rather than clearly numbering pages (i.e. Page 1, 2, 3...), it is numbered in exercise numbers so pages go EX 1, 2, 3, etc.

Therefore when you refer back to a page for something, it would be something like page EX 104.

Then each exercise was also numbered in steps. I don't quite understand the benefit of doing it this way. But it definitely took some time to figure out. However I do have to admit the examples themselves were extremely detailed, step by step, and easy to follow. It literally teaches you Excel from A to Z, with so many screenshots for you to follow. I enjoy this book because there's very little "lecturing" in the book. You simply open it up to the first chapter and follow along (type this, open that, click on this, etc) and by the end of each chapter you will have created a complete spreadsheet. It took me an average of 3-4 hours per chapter to complete. You start off chapter 1 creating a basic spreadsheet (entering info, resizing, printing) and by chapter 2 you are already on to typing formulas. Pretty good! This book is huge and worth the price.

Will not contact me back! No information. Going to charge me again. I have already returned the book.

So confused book

Amazing! Love n the amazingly fair book prices!
