## Customer Reviews

Grade 4-8-A lively biography of the ultimate Renaissance man. Herbert describes Leonardo's life while also providing a good deal of historical information about Italy and background about art. She explains how Leonardo used the artistic techniques and materials available during his lifetime, as well as his own unique ideas, to create masterpieces. However, youngsters will also gain insight into Leonardo as a scientist, inventor, and humanist. Presented for consideration are his detailed sketches of human anatomy (the first of their kind), maps drawn from a bird's-eye view, and designs for such things as diving suits and hang gliders that weren't invented until hundreds of years later. A few projects are also included. Youngsters can make a kite based on Leonardo's drawing of a parachute, cook up his favorite meal of minestrone soup, or grow a Renaissance herb garden. The

high-quality reproductions of the artist's sketches and paintings coupled with an interesting text give readers a full picture of this truly amazing man. A list of related Web sites is included. Michele Snyder, Chappaqua Public Library, NY Copyright 1999 Reed Business Information, Inc.
