Age Range: 8 - 12 years

Grade Level: 3 - 6

## Customer Reviews

Gr 4-6-The colorful, appealing design will draw students to these fact-filled titles about popular winter sports. (Actually, curling's still gaining fans: though enjoyed by 1.2 million Canadians, only 16,000 people in the U.S. play). The books' tiny font is offset by attractive design elements, including the use of captions, highlighted information, and sidebars in bright colors. Dramatic color photos and a readable text cover important athletes, rules and gear, and instructions for both watching and/or participating in these sports. One noteworthy feature is mention of differently abled athletes and the ways in which they may participate in athletics such as sled hockey and the Paralympic games. All the volumes include a quiz, and Curling and Figure Skating offer topics for further research. Fact-filled and readable, these titles will be a hit with both sports browsers and research writers. Claire Throp loves sea mammals and spent far too long looking at them while supposedly doing research for this book! She has written children's nonfiction on subjects ranging from countries to sports to. She lives just outside Oxford, England.

Very very basic. Probably great for a younger child.

It was very Boring and dragged everything out
