## **Customer Reviews**

My wife and I were not connecting as much as we use to. I had her take the test and learned her love language. I wanted to understand more about how to connect with her and this book was the key! The Five Love Languages for Men was written perfectly for a husband looking to connect with his partner. The reason I like this book is because each love language has it's own chapter. This made it easy to go straight to my wife's love language and learn how to connect with her. I also like this book because it is easy to understand. Some of the actions that must be done to fill your wife's love tank can be hard, but this book tells you how to fill your wife's love tank and gives you hope.

Easy to follow and made a real difference in our relationship. If you want to enhance your wife's life experience, this is for you.

A lot of good thoughts and insight about relationships. A good listen for couples and lovers

I loved the original so much that I bought this one for my boyfriend.

A great book even if you aren't having trouble in your relationship! The love languages are such an important aspect to any relationship, and this book offers amazing insight that can do nothing but great things for you!

Like the origin title written to couples generally, this book is thought-provoking, inspiring, and concrete. It is easy to see how the information and suggestions can be applied. The difference is that this work is written specifically to us men. We can understand and identify with what we read. I've been happily married for over 35 years, but I found plenty of advice that I can, should, and intend to apply. My suggestion to other men who seek a higher level of marital communication, love and happiness: read the book! And then implement it.

Great book. Have been following the advice from it and enjoying the results.

Just when I thought my marriage was close to an end. This book helped me realize that it was not. We just needed to speak each others language.
