Age Range: 2 - 5 years

Grade Level: Preschool - Kindergarten

Customer Reviews

SUE FLIESS is the author of numerous children's books for various publishers. She's also a freelance writer and a copywriter for a high-tech company, and lives in the San Francisco Bay Area with her husband, two sons, and a rescued Lab named Teddy. Her next Little Golden Book, How to Be a Pirate, will be published in Spring 2014. BOB STAAKE has illustrated many popular titles for Golden Books, including We Planted a Tree; I'm a Truck; and I'm a Monster Truck. He wrote and illustrated the Golden titles The Red Lemon, a New York Times Best Illustrated Children's Book of the Year, and The Donut Chef, a Children's Choice Book Award finalist.

In her book, ROBOTS, ROBOTS EVERYWHERE, author Sue Fliess teaches children an important lesson--they better find a job that cannot be replaced by a robot. Indeed, robots do pretty much

everything in this book from direct air traffic to making donuts. The story is cute and written in rhyming verse with the common refrain of robots, robots everywhere. The illustrations are a funky, emphasis on the FUN! Robots are depicted doing various jobs, but they have human qualities to them such as human physical features and showing emotions. The book is by no means intended to be some sort of scientific essay on modern robotics, but it is a great transition to talking to kids about robots and automation. Reading it led to several YouTube videos of robots doing various things, and it made me really, really wish I could afford a Roomba. Oh well. I bought this book as part of a robot theme around Christmas as an early present on the buildup to giving my kidÂ Kid Galaxy Robot Data. If you are thinking of something similar surrounding robots, there are also affordableÂ Robot Party Favors Lot of 20 RobotsÂ andÂ Carson Dellosa Robots Prize Pack Stickers (168063)Â worth considering.

Kids will love the fun rhymes and clever illustrations about robots they see everywhere both in space and around the house. One friend I gave it to said her son read it four times in one night, and reads it all by himself!

Although this book is a little shorter than I'd like (or, shorter than my son would like), the cadence and story are delightful and my three year old loves it!!! He recently got a metal robot as a gift, so I bought this book as a companion for the real thing and it was a hit. The images and rhymes are captivating for my little guy, even if the story doesn't make a ton of sense... which doesn't matter to my three year old at all!!!

My son loves robots. This book was perfect for him with it's rhymes and repetition. There are many colorful illustrations for a young child but I would not recommend it for a child older then 6 years old. Best for preschoolers and kindergarten aged children.

Meh. I wanted to like this book but ... zzzzzzzz. The illustrations are lovely, and for that I give it 3 stars. I have a 4 year old son who loves all things robot and so I was psyched to give this book to him. It held his attention for all of about 5 minutes. The writing is really canned. Imagine if Dr. Suess had a boring cousin Stew, and Stew phoned it in. I've seen better writing in the \$1 books, in the impulse buy section at Target.

My 2 year old and 1 year old LOVE this book. We checked it out from the library and didn't want to

return it! We were so happy to find it on . I love that it's a larger board book! The rhymes are adorable and the pictures are so fun for a robot loving kid! We love it!

We love this book. However, this particular book that they're selling is not a board book and has paper leaves. In the product description, they've described it as a board book. While paper leaves might now okay for older kids, it hasn't got a long future in the hands of a toddler. We will be returning it.

Awesome book I bought for my 2 year old. My kids just can't get enough of it! I think my 1 year old daughter loves it the most! The pictures are beautiful and so are the rhymes!
