Chemistry: An Introduction To General, Organic, & Biological Chemistry (10th Edition)

Synopsis

SHORT RETAIL DESCRIPTIONÂ Designed primarily for the one-semester GOB course, Chemistry: An Introduction To General, Organic, And Biological Chemistry, Tenth Edition continues to lead the market with its clear and friendly writing style and real-world health related applications that students can relate to. This new edition introduces more problem-solving strategies and new conceptual and challenge problems. Also, each Chapter Review has been enhanced with Learning Goals to reinforce the mastery of concepts for students. Â Measurements, Atoms and Elements, Nuclear Radiation, Compounds and Their Bonds, Chemical Reactions and Quantities, Energy and Matter, Gases, Solutions, Acids and Bases, Introduction to Organic Chemistry, Unsaturated Hydrocarbons, Organic Compounds with Oxygen and Sulfur, Carboxylic Acids, Esters, Amines, and Amides, Carbohydrates, Lipids, Amino Acids, Proteins, and Enzymes, Nucleic Acids and Protein Synthesis, Metabolic Pathways and Energy Production. Â For all readers interested in receiving an introduction to general, organic, and biological chemistry.

Karen Timberlake is professor emeritus of chemistry at Los Angeles Valley College, where she taught chemistry for allied health and preparatory chemistry for 36 years. She received her bachelorâ™s degree in chemistry from the University of Washington and her Masterâ™s degree in biochemistry from the University of California at Los Angeles. Â Professor Timberlake has been writing chemistry textbooks for 30 years. During that time, her name has become associated with the strategic use of pedagogical tools that promote student success in chemistry and the application

of chemistry to real-life situations. More than one million students have learned chemistry using texts, laboratory manuals, and study guides written by Karen Timberlake. In addition to Chemistry: An Introduction to General, Organic, and Biological Chemistry, Tenth Edition, she is also the author of General, Organic, and Biological Chemistry, Structures of Life, Second Edition and Basic Chemistry, Second Edition, along with the accompanying Study Guide with Solutions for Selected Problems, Laboratory Manual, and Essentials Laboratory Manual. Professor Timberlake belongs to numerous science and educational organizations including the American Chemical Society (ACS) and the National Science Teachers Association (NSTA). She was a Western Regional Winner of Excellence in College Chemistry Teaching Award given by the Chemical Manufacturers Association. In 2004, she received the McGuffey Award in Physical Sciences from the Text and Academic Authors Association, for her textbook Chemistry: An Introduction to General, Organic, and Biological Chemistry, Eighth Edition, which has demonstrated excellence over time. In 2006, she received the Textbook Excellence Award for the first edition of Basic Chemistry. She has participated in education grants for science teaching including the Los Angeles Collaborative for Teaching Excellence (LACTE) and a Title III grant at her college. She speaks at conferences and educational meetings on the use of student-centered teaching methods in chemistry to promote the learning success of students. Her husband, Bill, is also a professor emeritus of chemistry and has contributed to writing this text. He taught preparatory and organic chemistry at Los Angeles Harbor College for 36 years. When the Professors Timberlake are not writing textbooks, they relax by hiking, traveling, trying new restaurants, cooking, and playing tennis. The Timberlakes' son, John, and daughter-in-law, Cindy, are involved in preparing materials for English language learners. Their grandson, Daniel, and granddaughter, Emily, don't know what they want to be yet.

Going through the study checks and questions and problems for every chapter has helped me tremendously to keep a high A in my Chem 105 class. I wish there were answers to the even problems as well to check myself.

great deal! I read, highlighted, and wrote on this book more than on any other textbook I ever had. It was in great conditions when I got it (now it looks like a kindergarten book) and I would only recommend you to buy it if your professor is using the same version or the next one because it is the same thing except for the cover and pages numbers.

It arrived in a timely matter, and was exactly like the product which was featured. The cover makes

chemistry not seem so terrifying!

I had to have this book for my Chemistry class. This seller shipped item fast, and received book in just a few days, and was very impressed, because I have bought other items off this site and it take a long time to receive it. It was great to receive the fast delivery, also the condition of the book was exactly in the condition stated, it was like new, no damage at all to book, no writing or no highlighting or anything in the book, and it was for a great price only 4.50 plus shipping, cant beat that at all. The only problem I had with this item was it didn't have the mastering chemistry access code with it, and I have to have it for my class as well, and to be a new book never used, I thought it should be included, but I not complaining cause of the great deal I got, so I can buy what I need cause of the extra money I saved on this item. I recommend anyone purchasing from this seller, cause the honesty means a lot. Thanks for the fast shipping and the new condition book, for such a great price.

This is a great chemistry book. It explains everthing in detail. I guarantee if you read the book along with your professors lecture, you WILL get an A or B in the class!The book was in good condition. I was very happy with my product.

Painful. Had trouble getting thru the required readings in advance of classes. Not that book is bad per se, just that it's a heavy read. Other class members using same book found it very helpful. Different learning styles I suppose.
