If you are going to charge an absurd amount for a textbook that does not actually explain anything, at least bind it. This collection of loose pages has like a paragraph of introduction in each section, followed by a bunch of poorly explained examples. There is really no aspect of teaching in this. It just feels like a laundry list of sections and examples.

Same issue as the others, book comes in loose leaf. Is it really too expensive for them to bind the book? I paid \$170 for a textbook, not a stack of papers.

For \$150 all I get is a stack of loose pages. For that price they couldn't even bind the book?

The lose leaf paper drives me crazy. Also the worst math book I have ever used. Very disappointed.
