Customer Reviews

PAUL KRUGMAN, recipient of the 2008 Nobel Memorial Prize in Economics, is Professor of Economics at Princeton University, USA, where he regularly teaches the principles course. He received his BA from Yale and his PhD from MIT. Prior to his current position, he taught at Yale, Stanford, and MIT. He also spent a year on staff of the Council of Economics Advisors in 1982-1983. His research is mainly in the area of international trade, where he is one of the founders of the 'new trade theory,' which focuses on increasing returns and imperfect competition. He also works in international finance, with a concentration in currency crises. In 1991, Krugman received the American Economic Association's John Bates Clark medal. In addition to his teaching and academic research, Krugman writes extensively for nontechnical audiences and he is a regular op-ed columnist for the New York Times. ROBIN WELLS was a lecturer and researcher in

Economics at Princeton University, USA, where she has taught undergraduate courses. She received her BA from the University of Chicago and her PhD from the University of California, Berkeley; she then did her postdoctoral work at MIT. She has taught at the University of Michigan, the University of Southampton (UK), Stanford, and MIT. Her teaching and research focus on the theory of organizations and incentives.

This book is very good. It give modern examples that are easy to understand to back of the explanation that is given. The book is easy to follow and has very good clear information explaining macroeconomics. The print is clear and not too small which makes it easier to read

I've read other macro texts and I prefer this one the best. There are a lot of real life examples of economics that relate to today's world (which helps in understanding) and the explanations in the text also serve to be very helpful as well. It's a little long winded, and somewhat repetitive, but believe it or not, I've found that this is very very helpful for one's understanding of the material. Plus it starts out very basic, allowing anyone to learn a basic understanding of how our modern economy, whether it be for a class or on their own.

My daughter needed it for college

Decent textbook but the chapters are a bit repetitive. Definitely look at the chapter summaries before an exam.

Excellent book. Have now read it in its entirety and appreciate tthe clarity of presentation and its integration of international macro. A must read for anyone interested in learning macroeconomics at the introductory level.

good enough

Great examples and callout boxes, and summations of chapters. A few too many esoteric idealized graphs for me, but I guess that comes with the realm.

not very helping book. I end up self study via Youtube and only use it for 2 chapters and never touch it again.
