Milady's Skin Care And Cosmetic Ingredients Dictionary

Synopsis

The second edition of this thorough reference is an invaluable tool for assessing cosmetic products, addressing both the quality of the product and the effect it has on the skin. Since a product's ultimate purpose is to benefit the skin, it is crucial to have an understanding of how the skin works, how and why a product may or may not penetrate it, and what care individual skin types and conditions may require. It is difficult to discuss product ingredients without correlating product performance to skin function. An expanded section on skin physiology and chemical concepts enables the reader to better understand product performance through a thorough explanation of how chemicals and ingredients interact. The various skin types, conditions, and appropriate ingredients for treatments provide a quick reference to address clients' needs. This enlarged second edition contains over 2,000 ingredients including 200 new and updated entries. Expanded information on antioxidants and their stability, new discussion on aging and sensitive skin, and function of SPF and new sunblock ingredients offering full spectrum sunscreen and sunblock for both UVA and UVB rays has been added. A complete glossary of terms found in the skin physiology section familiarizes readers with the terminology used by chemists, and an appendix cross-referencing Latin botanical names with commonly used names complete this reference.

Natalia Michalun was an international dermo-cosmetic expert and educator. She had lectured to medical and esthetics professionals in more than 35 countries, and has been recognized for her

in-depth knowledge and ability to share complex skin care concepts clearly and precisely. A graduate in Chemistry from the University of Buenos Aires, Argentina, Natalia has sat on the board of the EU's COLIPA, and the California State Board of Cosmetology. In 1980 she founded the first school for advanced esthetics in Northern California, in addition to having one of the region's largest esthetics salons. Her articles appear in professional magazines throughout the world. M. Varinia Michalun has specialized in international cosmetics marketing and new product development and has lectured on cosmetic ingredients and product use to professionals in the United States, Europe, Australia, New Zealand, and Asia. Her experience also includes skin care salon management and esthetics education. She has authored articles for industry magazines, provides expertise to beauty journalists, and is a contributor to Milady's Standard Advanced Esthetics text as well as co-author of The Skin Care and Cosmetic Ingredients Dictionary from Milady.

I have very sensitive skin and I have allergic reactions to different products and moisturizers, so I want to research ingredients in some products that my skin may be reacting to. This dictionary is so comprehensive and has excellent information and easy to understand descriptions on ingredients and if they are considered toxic or not and if they may be reactive to many! Great book for anyone who adores beauty and skin care! Highly recommended!!

Well I gave this to my mom and she is happy

This is a very dry reference book. It is geared more towards cosmetology students and is also from 2001. I prefer A Consumer's Dictionary of Cosmetic Ingredients by Ruth Winter. It's a bit more current, 2005, and more enjoyable to read.

I bought it for a friend and she received it in a timely manner. She was very happy with the book and I am happy with the purchase. Thank you.

I loved this book. You can about different things can help your face. Not really any products to be used just list of products. Very knowledge info.

I use this book all the time in my line of business. I work in the personal care & beauty industry and use this like a bible. Need to find this in electronic form to carry with me all the time.

Love this book, excellent reference

Great book to add to my library
