some of the personal statements in this book made me cringe, either because of something the applicant said or how bad the writing was. Suffice it to say, most of these applicants got in with their high GPA, not because of the depth in their personal essays. Since I bought this book to see examples of stellar essays, I was disappointed with the quality of writing. The tips offered before the essays weren't all that useful either--things anyone with common sense would know without having to shell out \$12.

I didn't like most of the essays in this book because I didn't find their narratives compelling enough. I volunteered to give feedback on personal statements on Reddit and I found even those touched me more. I gave this book a 3/5 star review, however, because some of these essays had great sentences I could model after. It especially helped me with syntax and flow of my own essay

So I read the older version of this (the one with the John Hopkins photo cover from 2010) and it was phenomenal!!!! I'd disregard the other comments saying it's terrible, and this book tremendously helped to provide me structure for my personal statement. I'd recommend it to everyone!!!! I'd pay \$100 for this book now easily for how helpful it was for me. Really appreciative for Princeton Review for going out and making this.

I liked the do and don'ts throughout the book. I enjoyed reading the accepted applicant's essays. I will re-read when I get closer to applying.
