## Customer Reviews

"This sixth edition text prepared under the auspices of the American Association of Critical Care Nurses continues its mission as a comprehensive reference presenting quick access to the abundance of information necessary for providing high-quality care to seriously ill patients. Procedures are detailed in a consistent format covering purpose, prerequisite nursing knowledge, equipment, patient and family education, and patient assessment and preparation. Procedures are described step by step, with identification and delineation of rationale, special considerations, expected and unexpected outcomes, patient monitoring, documentation, and references. Icons identify procedures that require, for example advanced skills, hand hygiene, or personal protective equipment. Charts, tables, diagrams, and illustrations are all designed to present information efficiently and well." - Book News, Inc.

This newest edition of critical care policies updates the old version, adding chlorhexidine as the prep for procedures simplifying some procedures with icons. The new procedures that have been added, Noninvasive Ventilation, Fecal Management Systems, as well as several others have made this resource even more valuable. As always, when I update procedures or write new ones this is my primary source. Even my Med-Surg associates have found this manual helpful! I would recommend this to everyone.

Great book! Matches description. Good price!

I mean its a textbook.

Good book

good book

Item as described. Received in a timely manner.

Great reference for my department. I have been updating policies and this has met the need. I would recommend it

Very happy. Thank you
