Customer Reviews

It came and was really nice on the outside. But only the outside. The inside was filled with pen and pencil (I mean, that's okay. It's a used book.) But with pages ripped out? And it wasn't just one or two, there were sections of the book just ripped out. I didn't inspect the book because the cover was okay and looked fine, but I got to class and ended up not being able to use this for my lab.

Way too much writing on the book. And in pen.

Product is missing very vital pages, and has writing all over it. Renter beware.

great condition
