Customer Reviews

Gave it 4/5 because kindle version has errors and typos.- 1.20 misaligned problems with wrong results (d and f)- 2.2 b) $t_3=t_1=2d=18$ should be $t_3=t_1+2d=18$ - 4.10 b) j_2 is given, whereas the solution is for j_2 And those just are the problems that I spotted with my mathematically untrained

eyes. Overall great content! It's a pity that my university didn't offer a finance course that would focus solely on solving such problems. If anyone knows other good book on mathematics of finance (with solutions) please let me know! Would highly appreciate!

Book was great supplement to text

Great book to have as a review for mathematical concepts.

Great book. Just in time to review for the beginning of the new semester.

Very good book

love it

This don't work for me because I need to start at a more elementary level. It appeared that this book had a lot of solved problems and would be very helpful to the appropriate student level. My mistake.

Just the right info in the right amount with exercises! Easy to apply and to enter new topics. Great buy and price!
