Got 2 of these and used them in a home health care course with a friend at a local tech college. Really good price for books that would have cost a lot more at the college bookstore.

Home Health Care Aides are the unsung stewards of the nursing community. They go into people's homes and perform duties that allow the caregiver to catch a breath take time out for themselves. This book covers the duties that home health care aides perform. It intermixes training information with actual case stories by home health care aides themselves. As my teacher told me when I was taking my home health care class, if you can answer the questions at the back of the book you can pass the class.
